

3 easy steps to secure e-mail

How to set up the free trial from Comendo FZ LLC

| | |
|---------------|---|
| Step 1 | Fill out the trialformular |
| | Attached in the e-mail you will find our trial formular as a word document, fill it out and sign it, then send it to co@comendo.ae, thank you. |
| Step 2 | Setup your Firewall |
| | Allow your network to receive mail from these IP ranges: A. 195.242.120.0/24 (EC1A) B. 89.104.217.0/24 (EC1B) C. 89.104.216.0/24 (EC2) D. 208.43.228.176/29 (EC3) |
| Step 3 | Change the MX |
| | Now that everything is set up and ready, it's time to update the MX record, if you control your own MX record, please change it to: gw1.security.comendo.com (priority 10) gw2.security.comendo.com (priority 20) gw3.security.comendo.com (priority 30) <i>If someone else controls it, we can contact them and update it for you, using the authorisation in the trial formular.</i> The mail will be directed to a Comendo Data Center and we filter it and forward only the real mail to: <i>mx.customer-mailserver-here.com</i> |
| Extra | Outgoing mail scanning |
| | If you want to virusprotect and backup your outgoing e-mail, please inform us of all your sender IP addresses: Customer outgoing IP here: ??.??.??.?? And once we've accepted your IP addresses, please change your outgoing mail server (SMTP) to: smtprelay.security.comendo.com <i>IMPORTANT: You can only send through mail from the domains we authenticated in the system, so please send us a list of ALL the domains you expect to send through our system.</i> |
