

Propalms TSE 6.0

Access made easy...

- Propalms TSE 6.0 is a complete application delivery solution for Terminal Services and VDI environments
- Manage all your applications from ONE management console
Deliver both Terminal Services Applications or Virtual Desktops to end-users in a familiar, easy to use way
- Ease transition to Windows Server 2008
Support for Windows Server 2000, 2003, 2008 to allow for 'mixed' teams easing the transition over to Windows Server 2008
- Improved User Interfaces
New easy navigation menus and graphical performance counters simplify the administrative experience
- 'Best Fit' Connection Experience
Always makes sure that your end-users get the features they need irrespective of the operating system they are running

Based on the existing features of TSE 5.0 which included Application Publishing, Seamless Windows, Resource Based Load Balancing, Reporting and much more we have further enhanced our Application Delivery Solution in our next release, TSE 6.0

TSE 6.0 Features:

Windows 2008 Support

- TSE 6.0 will provide out of the box support for Windows Server 2008 Server
- We have extended support for all New Terminal Services Enhancements

Backwards Compatibility

- TSE 6.0 will be compatible with Windows 2000 and Windows 2003 along with Windows Server 2008!
- This will enable our customers to run 'mixed' TSE teams and ease their transition over to Windows 2008 while still using a common management interface across all servers

TSE 'Best Fit' Connection Experience

- Many Windows 2008 Terminal Services features will require the latest Desktop OS for support. For instance, TS Easy Print requires RDP client 6.1 and .NET Framework 3.0 SP1 by default only available on Vista. Therefore if a customer does not update all of their client devices they will not get the latest features from Windows 2008!
- Propalms TSE 6.0 will allow users to take advantage of this functionality if the client is compatible, but more importantly will provide a mechanism where if the client is not of sufficient levels still offer them an alternative for the features they require. i.e. Windows 9x/2000/XP clients connecting will be able to use HyperPrint / UniDriver capabilities

NEW User Interface

- A new TSE dashboard using advanced controls to show graphical displays of critical metrics within the Propalms Team
- New easy navigation menus, search facility, hyperlink menus and tooltips simplify the administrative experience
- Simple, Intuitive layout

Virtual Desktop Connection Manager

- Allows provisioning of 'Virtual Desktops' via Propalms TSE
- Will work with Microsoft Virtual Server, Hyper-V, VMware
- Perfect for customers looking for easy introduction to VDI
- Ideal for 'Power User' requirements

HyperPrint

- In-built PDF printing solution

Virtual IP

- Many applications have a requirement for a unique IP address per user instance in order for them to work
- In Terminal Services all users by default get assigned with the server's IP address to which they connect
- Virtual IP allows the assignment of a unique IP address to each Propalms TSE session from a pool of addresses which solves this problem

TSE Session Recorder

- Records Propalms TSE sessions for Compliance, Security and Support capabilities
- TSE Sessions can easily be re-played from within the Propalms TSE Management Console

Content Publishing and Redirection

- Publish individual files of all types directly to the LaunchPad
- Redirect Media and HTTP requests to local devices rather than running on the Terminal Server

User Principal Name Support For Console and LaunchPad

- Ability for a user to login to Console or LaunchPad using format username@domain.com

RDP Optimization

- Prioritize session and data transfer in RDP protocol

Other features include...

- Configurable RDP port
- File Association without IFS
- Disable Application capability
- Configurable Database name
- Add TSE role while joining team
- Configurable Report Date Format
- New Printer Naming Scheme definition
- New Redirect Default client printer only setting
- Single Installer for 32 and 64bit environments

Propalms, Inc. is a leading global provider of application delivery solutions for Terminal Services and Virtual Desktop Infrastructures. Delivering to Enterprises of all sizes we offer reliable, scalable and affordable solutions that simply work. Our belief is that application delivery solutions should be flexible, dynamic and above all, simple to use.
